

CLAIMS

We claim:

1. A scent lure dispenser comprising:
 - a center axis;
 - a first hemispherical body member;
 - a second hemispherical body member;
 - the first body member comprising a first body member inner surface defining an interior of the first body member, a first body member exposed surface, a first outer periphery, a planar first flange extending along and attached to the first outer periphery, a releasable means to couple to the second body member, and a means along the first outer periphery to form an airtight seal against the second body member;
 - the second body member comprising a second body member inner surface defining an interior of the second body member, a second body member exposed surface, a second outer periphery, a planar second flange extending along and attached to the second outer periphery, a releasable means to couple to the first body member, a means along the second outer periphery to form an airtight seal against the first body member, the second flange further comprising scent openings within the means to form an airtight seal.
2. The scent lure dispenser of claim 1, further comprising a scent carrier disposed within the interior of the second body member.

- 1 3. The scent lure dispenser of claim 1, wherein the first
2 and second body members are colored orange.
- 3 4. The scent lure dispenser of claim 1, wherein the first
4 and second body members are colored green.
- 5 5. The scent lure dispenser of claim 1, wherein the first
6 and second body members are colored in a camouflage
7 pattern.
- 8 6. The scent lure dispenser of claim 1, further comprising a
9 reflective material attached to the exposed first and
10 second body member surfaces of the hemispherical body
11 members.
- 12 7. The scent lure dispenser of claim 6, wherein the
13 reflective material is a plurality of adhesive reflective
14 dots.
- 15 8. The scent lure dispenser of claim 1, wherein the first
16 hemispherical body member further comprises:
17 a bore at the center axis;
18 a tab extending up through the bore at the center axis;
19 the tab further comprising an opening.
- 20 9. The scent lure of claim 1, wherein the diameter of the
21 peripheral edges of the body members is 2 inches.
- 22 10. The scent lure dispenser of claim 1, wherein the diameter
23 of the peripheral edges of the body members is 3 inches.
- 24 11. The scent lure dispenser of claim 1, wherein the lure
25 dispenser is constructed of plastic.
- 26 12. The scent lure dispenser of claim 1, wherein the lure
27 dispenser is constructed of wood.

- 1 13. The scent lure dispenser of claim 1, wherein the
2 releasable means to couple the first and second body
3 members comprises a threaded bore on the first flange
4 along the center axis and extended into the first body
5 member interior; and a threaded rod on the second flange
6 adjacent to and configured to couple to the threaded bore
7 on the center axis.
- 8 14. The scent lure dispenser of claim 1, wherein the means
9 along the first outer periphery to form an airtight seal
10 against the second body member comprises an "O" ring and
11 a first annular groove to receive an "O" ring; and the
12 means along the second outer periphery to form an
13 airtight seal against the first body member comprises a
14 corresponding and adjacent second annular grove to
15 receive the "O" ring.
- 16 15. The scent lure dispenser of claim 1 wherein the scent
17 openings comprise a plurality of circular openings evenly
18 spaced around a second flange center opening.
- 19 16. The scent lure dispenser of claim 2 wherein the scent
20 carrier is selected from the group consisting of felt,
21 wool, and cotton.
- 22 17. A method of luring an animal using a scent lure dispenser
23 comprised of first and second hemispherical body members
24 that are releasably coupled, means to form an airtight
25 seal when coupled, comprising the steps of:
26 placing gloves on a user's hands;
27 releasing the couple between the two body members;
28 placing a scent within an interior of the second body

1 member;
2 deploying the lure dispenser to a desired location;
3 collecting the lure dispenser when finished; and
4 forming an airtight seal between the airtight members.
5 18. The method of claim 17, wherein the step of deploying the
6 lure dispenser comprises the step of throwing the lure
7 dispenser.
8 19. The method of claim 17, wherein the step of deploying the
9 lure dispenser comprises the step of hanging the lure
10 dispenser.
11 20. The method of claim 17 wherein the step of releasing the
12 couple of the body members comprises the step of
13 unscrewing the body members wherein the first body member
14 has a threaded bore and the second body member has a
15 threaded rod.

16
